

Translational Research in Action

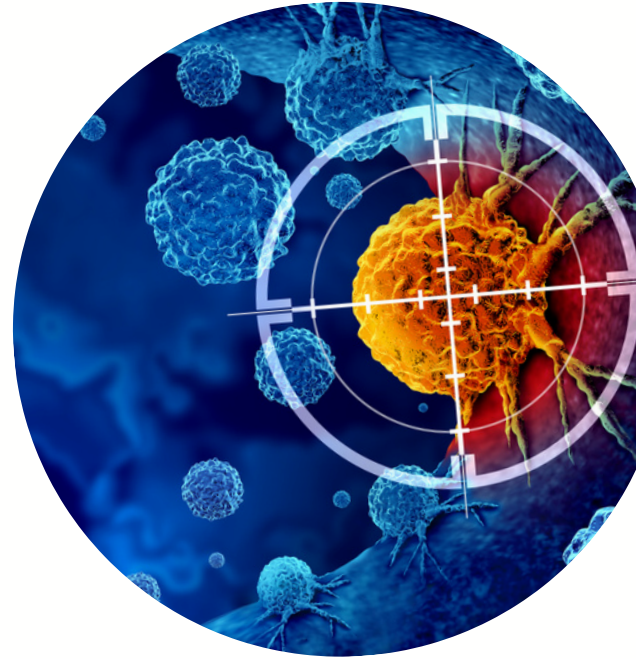

When:

Thursday 22nd February 2024

Seminar from 2pm - 4:30pm followed by afternoon tea and AGRF laboratory tour for those interested.

Where:

Westmead Institute of Medical Research,
WIMR Conference Room (C2.20)

Meet our presenters...

Dr Melissa Smith

Assistant Professor, Biochemistry and Molecular Genetics, University of Louisville, USA

Topic: large scale antibody and T cell receptor profiling to try to understand differential responses to pathogen infection, susceptibility to autoimmunity, and effectiveness of immunotherapy for cancer.

Professor Helen Rizos

Professor, Cancer Research,
Macquarie University

Topic: the value of ctDNA in predicting the survival and pseudo progression of melanoma patients treated with immunotherapy.

Dr Russell Diefenbach

Senior Research Fellow,
Macquarie University

Dr Weerachai Jaratlerdsiri

Senior Computational Biologist and Developmental Team Lead, Charles Perkins Centre, The University of Sydney

Topic: The rise of Long-Read Sequencing to improve cancer health disparities.
