

X Factor RNA Bundles Now with bioinformatics

RNA Seq bundles Now including bioinformatics

Experience the power of Illumina RNA sequencing, now including bioinformatics. Gain cost-effective and comprehensive insights into lowly expressed coding transcripts, ensuring accuracy in quantification and annotations.

Whole Transcriptome Bundles

- Available in 50M and 100M reads per sample
- Human, mouse and rat only
- Total RNA prep with Ribo-Zero Plus workflow
- NovaSeq X 150bp paired end sequencing
- Includes data QC and read alignment

mRNA Bundles

- Available in 20M, 50M and 100M reads per sample
- Human, mouse and rat only
- Stranded mRNA prep workflow
- NovaSeq X 150bp paired end sequencing
- Includes data QC and read alignment
